

ERRATA:
THE GAUSS HIGHER RELATIVE CLASS NUMBER PROBLEM

JOHN VOIGHT

This note gives errata for the article *The Gauss higher relative class number problem* [1].

- (1) Second paragraph, fourth sentence should read: “It is known that there are only finitely many CM fields K with degree $[K : \mathbb{Q}] = 2n$ and fixed relative class number”. It remains an open conjecture of Stark that there are finitely many without fixing the degree.
